End-to-End Design
Process

## TOOLS

Figma
Adobe Creative Suite
Sketch
Zeplin
Adobe XD

TECHNICAL SKILLS

UI/UX disegner **Not a developer** I design experience

HTML5
CSS3
JavaScript
Angular, TypeScript
Bootstrap
jQuery UI, SASS.

PROJECTS

347
Completed Projects

Weave App – UI/UX Design & Branding

The focus was on research synthesis, ideation and competition analysis. Wireframes were designed using Figma, which were then followed by a high-fidelity user interface design using Adobe XD. Branding was built in Illustrator, interactive mockups were created and tested with users, and the final designs were delivered via Zeplin.
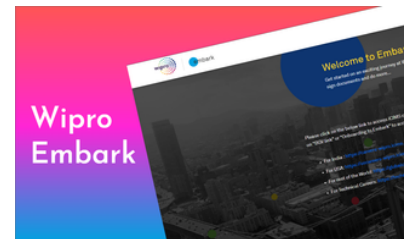

Remote Monitoring System (RMS) – UI/UX Design & Development

User testing, wire framing, and prototype design were made in Figma and Adobe xd . Designs were all validated with usability testing which ensured development of an easy-to-use dashboard and interface. As a result usability was tested, feedback was provided, design was adjusted to enhance user satisfaction and system performance.

Wipro Embark – UI Design

UI/UX was designed for Wipro candidate onboarding application in a manner that improved the user journey and minimized the time taken to onboard a candidate.
Developed design strategies for Wipro Embark with an emphasis on 'user' focus and 'ideation' processes. Developed wireframes and high-fidelity designs in Figma, and prototypes to support seamless usability flow. Worked closely with multi-disciplinary teams and ensured user-oriented design principles are used for better platform usability and system metrics.
